**EMERGING MARKETS CREDIT**

The Lyxor / Marathon Emerging Markets Bond Fund (the “Fund”) is a long only Emerging Market Debt strategy focused on Emerging Markets (“EM”) Sovereign & Quasi Sovereign bonds denominated in USD with additional diversification in corporate credit. EM may provide a diversified, uncorrelated return to a number of more traditional fixed income investments.

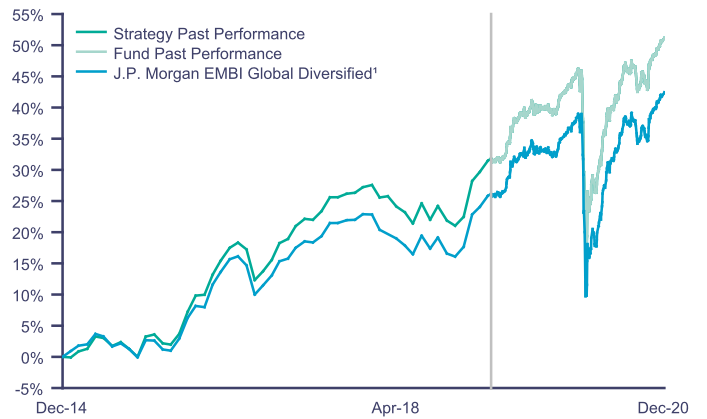

**ACTIVELY MANAGED BETA INVESTMENT APPROACH**

The Fund uses an actively managed approach to portfolio construction which seeks to provide an opportunity to capture the Beta of the asset class (as defined by the JP Morgan EMBI Global Diversified Index “EMBIGD”)<sup>1</sup> while generating Alpha through credit selection, sourcing capabilities, technical and relative value analysis.

**AN EXPERIENCED GLOBAL TEAM**

With more than 160 professionals and offices in New York, London, and Singapore, Marathon is a global asset manager. Marathon’s partners have worked together for ~17 years on average and each partner has on average more than 25 years of industry experience. The team-based approach leverages Marathon's franchise and core competency of deep-dive fundamental credit analysis paired with an extensive understanding of Emerging Markets credit dynamics. The team members' expertise spans various Emerging Markets cycles, while the firm has been invested in the asset class since its inception in 1998.

**GLOSSARY**

**Annualized Return** – a rate of return for a given period that is less than one year, but that is computed as if the rate were for a full year. The formula is as follows assuming that M is the total number of months of returns which are being measured within the Program:  $(1 + \text{Cumulative Returns})^{(12/M)} - 1$ .

**Annualized Volatility** – the square root of 12 multiplied by the Standard Deviation.

**Sharpe Ratio** – this is a formula used to measure risk-adjusted performance. This is calculated by subtracting the risk-free rate (in this case, 1M Fed Funds) from the rate of return for the Program and dividing the result by the Standard Deviation.
